LeetCode: leetcode.com/dev-d-patel

Full stack developer with **4+ years** of experience building **Node.js**, **NestJS**, and **React** applications. I design backend systems, lead small teams, ship AI features end to end, and move legacy stacks to modern ones without breaking what is already in production.

EXPERIENCE

FULL STACK WEB DEVELOPER

2024 – PRESENT

Codiste | Ahmedabad, IN

- Lead full stack development across multiple enterprise apps using **Node.js**, **NestJS**, **TypeScript**, and **React**, owning system design, code reviews, and production deploys end to end.
- Built an AI-powered podcast backend with **NestJS** and **LangGraph** that mixes location-based news and music content, wiring up LLM orchestration, **Redis** queues, and stateful workflows.
- Architected the backend of a Legal AI platform using **Express**, **MongoDB**, and **OpenAI GPT-4o** — powering chat, document processing, meeting transcription, streaming legal research, and case-brief generation; integrated **Razorpay**, **Twilio**, **WhatsApp Business API**, and Google Calendar/Drive.
- Led a clean migration of a **Java** backend to **Node.js** for a financial transactions app, and moved another product from **MongoDB to PostgreSQL** — both with no downtime, plus measurable response-time wins from caching, payload trimming, and query tuning.
- Designed a **Turbo monorepo** backend with **NestJS** and **PostgreSQL**, using **Redis** for caching and background queues, keeping service boundaries clean as the platform grew.
- Set up **CI/CD** with **GitHub Actions**, **NGINX**, and **AWS EC2 + RDS** deploys for backend services that serve multiple client apps, with **JWT** auth, **role-based access control**, and scheduled **CRON** jobs.
- Built a real-time multiplayer **Telegram** game with **Socket.IO** and Redis-backed state sync, plus several Telegram mini-apps and bots with referral systems and gamification.

ASSOCIATE SOFTWARE DEVELOPER

2022 – 2024

Rysun Labs | Ahmedabad, IN

- Led a team of 3 backend developers to build the admin portal of a **Next.js** visitor app, using **FCM**, **AWS S3**, and **PostgreSQL** on AWS; ran Scrum, owned client communication, and shipped on schedule.
- Worked with a team of 7 on a **Next.js** web app for printing digital ID cards, including a drag-and-drop **React** template editor and dynamic PDF generation from JSON templates.
- Received the **"Best Intern"** award for performance during the internship at KCS.

SKILLS

Languages	TypeScript, JavaScript, Node.js
Backend	NestJS, Express, REST APIs, GraphQL, WebSockets, Microservices, Monorepo (Turbo, PNPM)
Frontend	React, Next.js (App Router, Server Actions, SSR), Redux, Zustand, TanStack Query, Tailwind, Shadcn UI, Material UI
Databases	PostgreSQL, MySQL, MongoDB, Redis, Prisma, Mongoose
Cloud & DevOps	AWS (EC2, RDS, S3, SES), NGINX, GitHub Actions, Docker, Vercel, Firebase
Practices	System design, CI/CD, performance tuning, code review, Agile / Scrum, team leadership, client communication

EDUCATION

BE Computer Engineering	— LJ Institute of Engineering and Technology	CGPA 9.56	2018 – 2022
Higher Secondary School	— M.B. Patel Secondary and Higher Secondary School	86.6 percentile	2016 – 2018

CERTIFICATIONS

- **React.js** — Certified from VSkills (VS-1429)
- **Node.js** — Certified from HackerRank
- **Graph Developer Associate** — Certified from Apollo GraphQL
